Referral Policy Agreement & Disclosure

The purpose of the referral policy agreement is to specify in advance of any referral(s) that may be made to you during the course of treatment, how the Center makes referrals to outside resources when needed or desirable.

If inpatient or other care is recommended, the Center will refer to one or more service providers, and it will be the responsibility of you as the client to review and select which provider to use, if any. Your therapist will answer questions and provide feedback to you during the course of your selection process, but ultimate responsibility for review, consideration and selection of the provider will be made by you, the client.

The Center works collaboratively with many services providing organizations and has business interests and relationships with very many referral resources (companies which provide care to Center clients, and to whom the Center provides services for their clients), and the Center hereby discloses this fact to the you, the client. Any guidance or consideration provided to you by your therapist will be made in response to questions posed by the client, and will reflect your therapist's best clinical judgment for your care.
